Graduation Year

Distribution of alumni based on their year of graduation

Grade Point Average (GPA)

Final academic performance of graduates based on their GPA

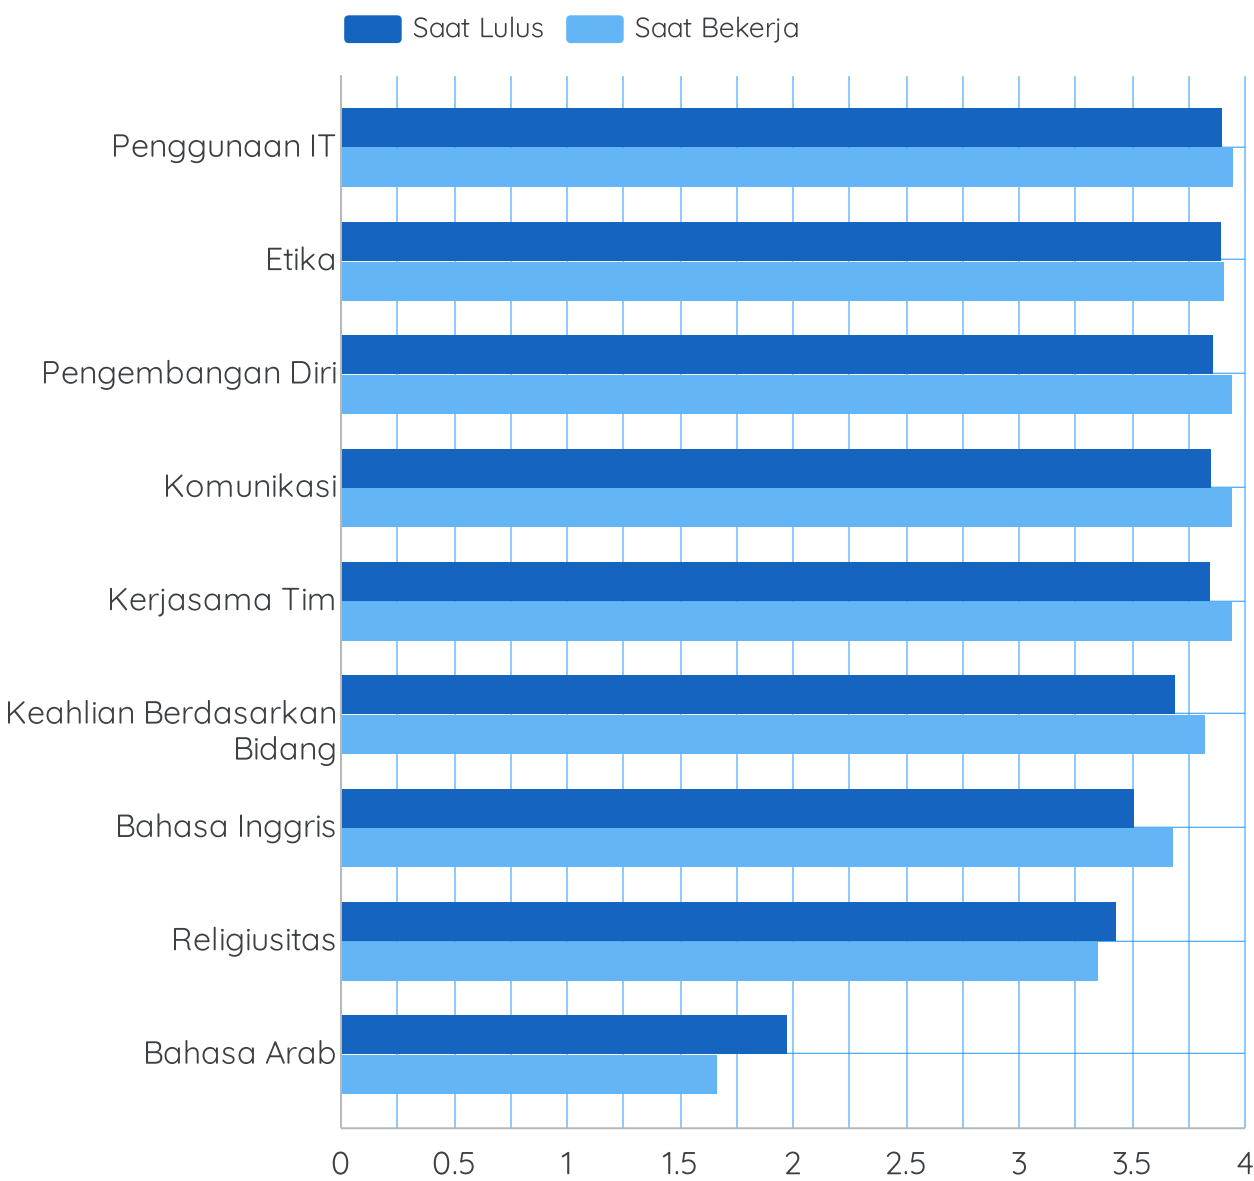

Competency Evaluation

Assessment of skills and learning methods

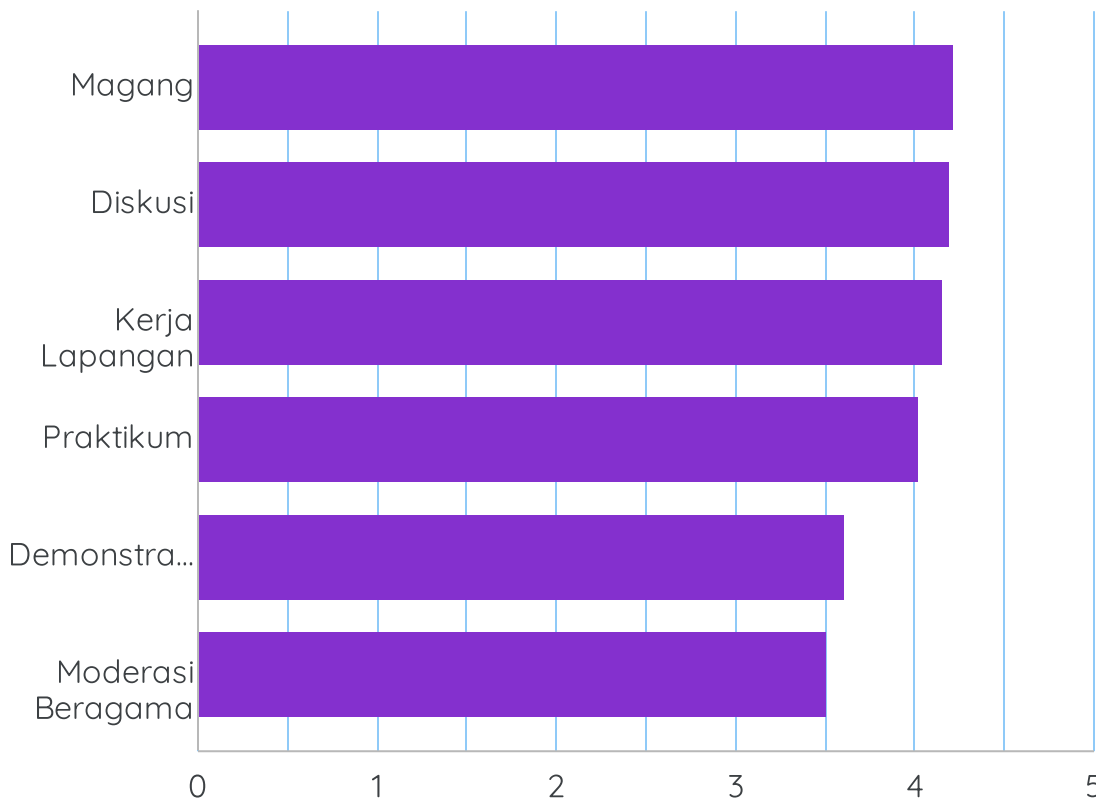

Major Competency Gaps

Mastery level at graduation vs. necessity level in the workplace

Learning Method Effectiveness

Alumni feedback on the emphasis placed on various learning methods

Strengths in Soft Skills: Alumni show excellent mastery in Self-Development and Teamwork, which align perfectly with industry expectations.

Primary Gap: The most significant competency gap is found in English Proficiency and Field-Specific Expertise, where workplace demands currently exceed the mastery level at graduation.

Values vs. Utility: Religiosity and Arabic Language are mastered well as core university values, though they show lower direct necessity in daily professional tasks compared to technical skills.

Practical Priority: Internships (Magang) and Practicums are rated as the most essential methods for translating theoretical knowledge into professional readiness.

Interactive Learning: Group Discussions and Field Work are highly valued for developing the communication and collaborative skills that are critical in the Information Systems sector.

Holistic Approach: The inclusion of Religious Moderation in the curriculum ensures graduates possess the social and ethical maturity required in diverse work environments.
